TREETINO

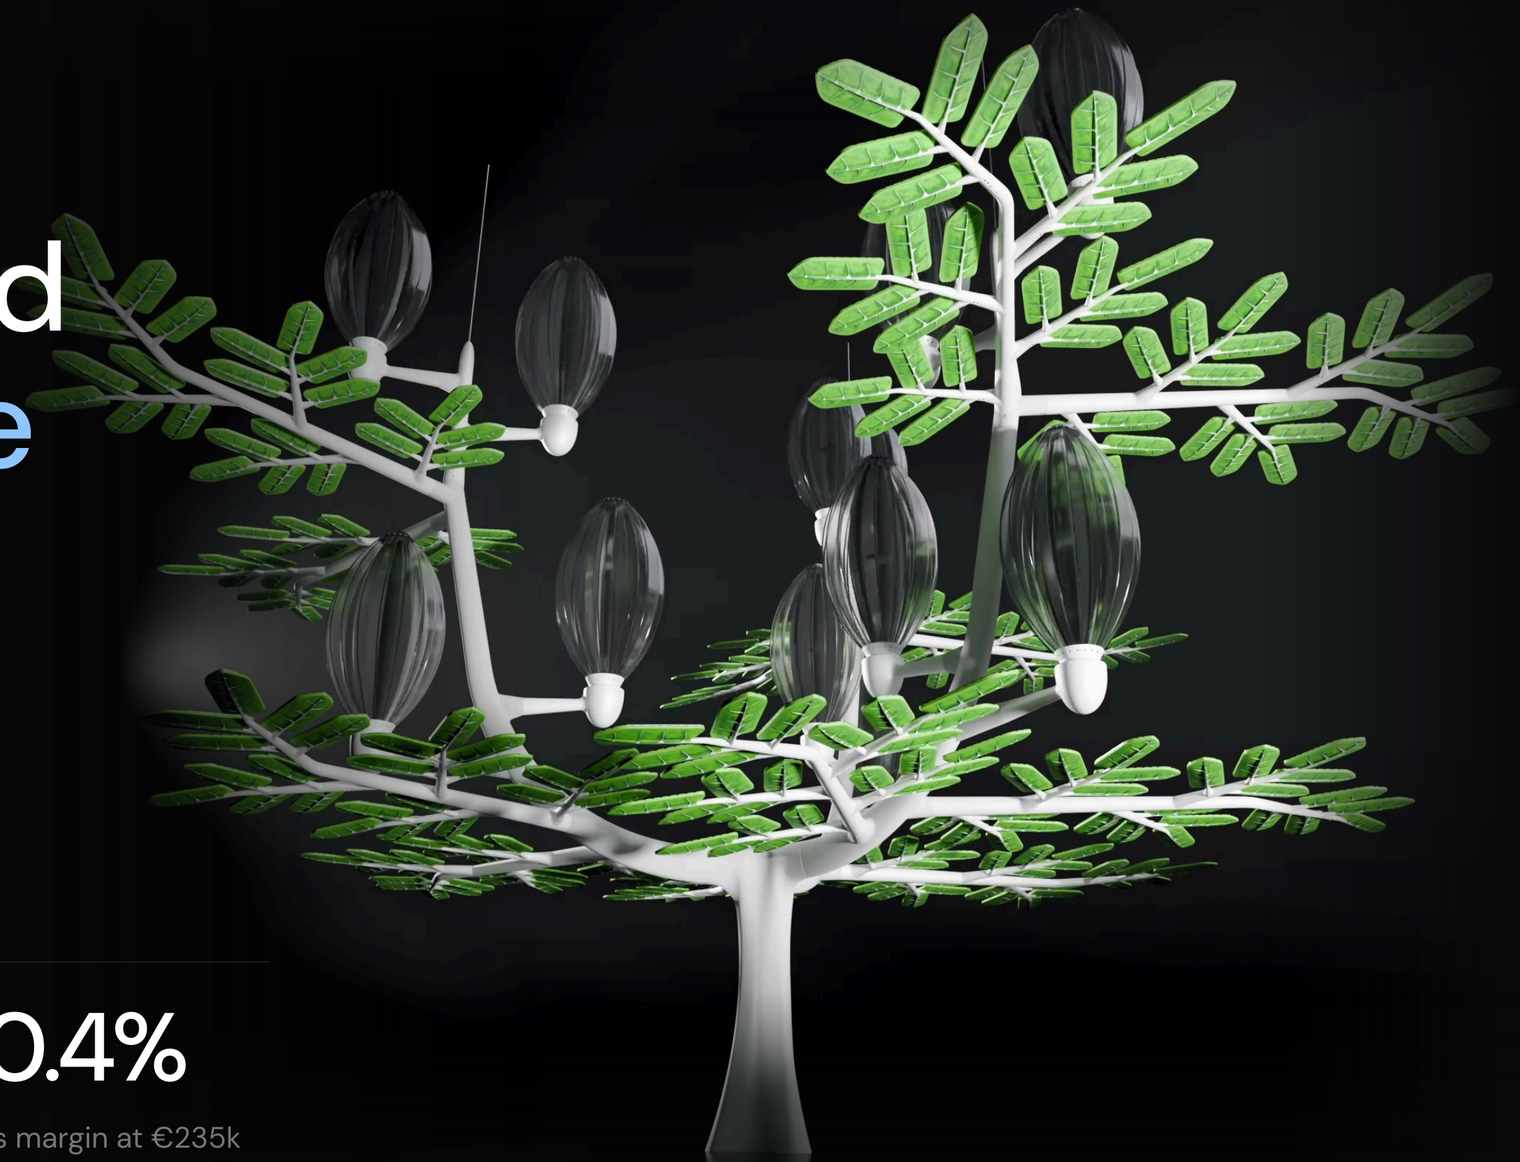

The future of energy, rooted in sustainability.

treetino.eu

Factory roofs are full.
Grid connections are capped.
Industry still needs more power.

Treetino V1

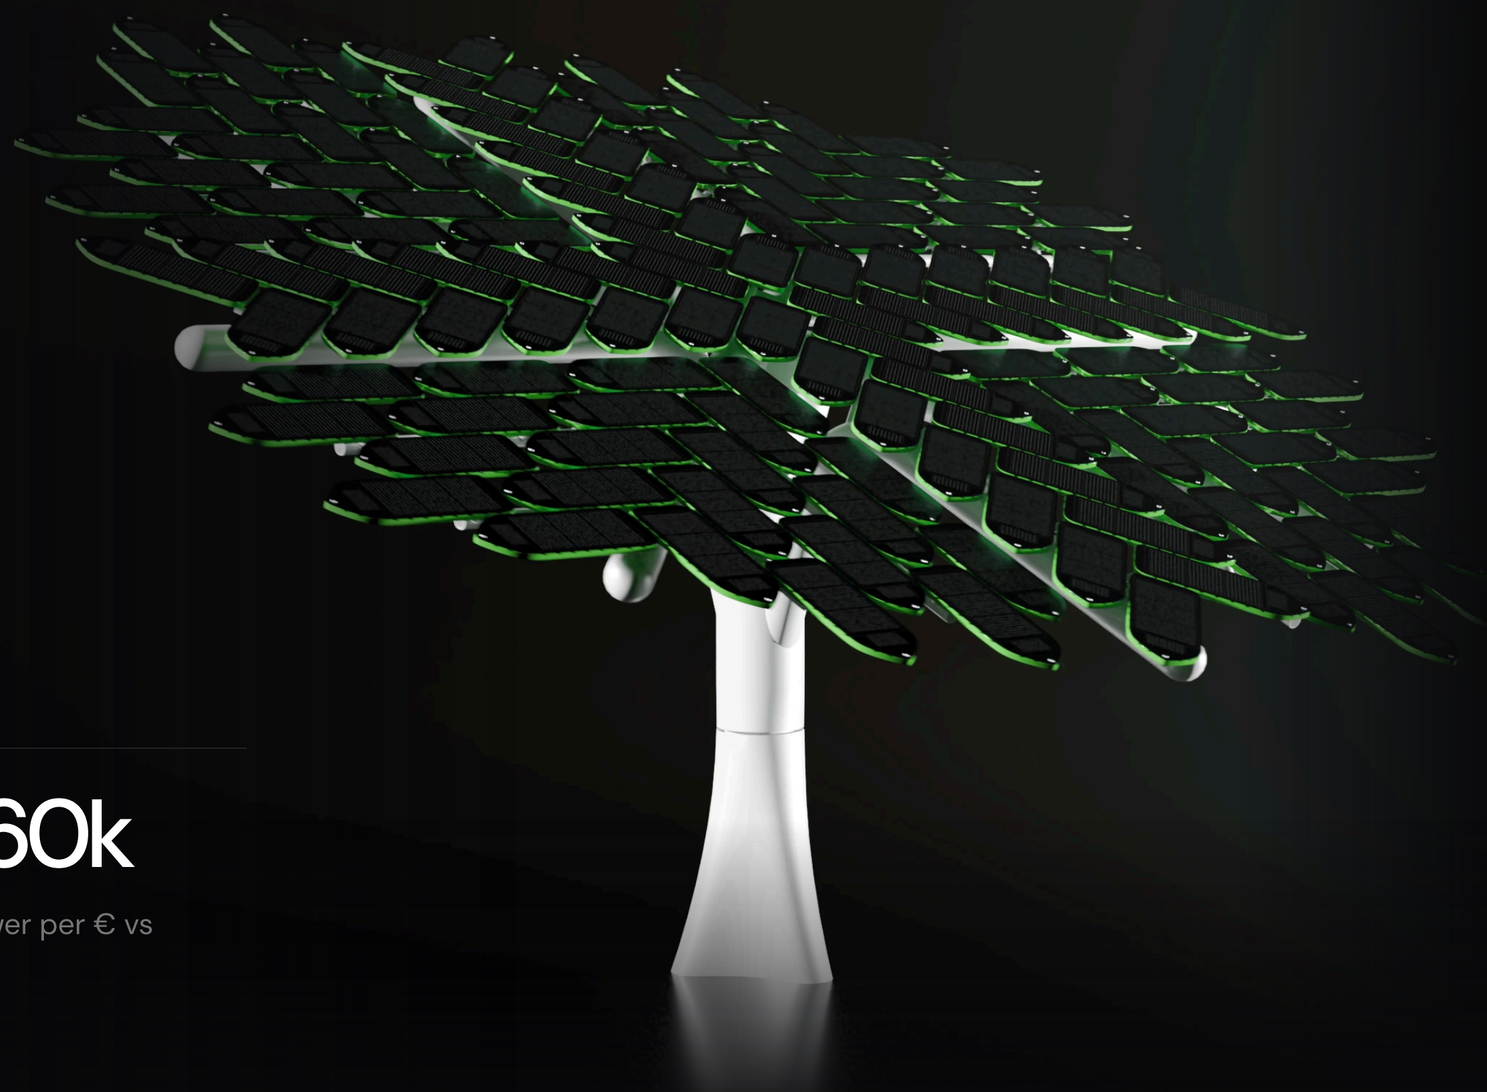

49 kW of wind and sun on one square metre.

300	12	40.4%
Solar leaves	Wind turbines	Gross margin at €235k

Treetino V2

12 kW that follows the sun.

+28.4%
Yield from AI sun-tracking

< 5.5 m
No building permit

€60k
4× power per € vs market

Treetino Aero

Wind power you can't hear.

3 kW
From 1.8 m/s of wind

< 30 dB
Quieter than a whisper

€4k
4-year payback

R&D is done. We're building.

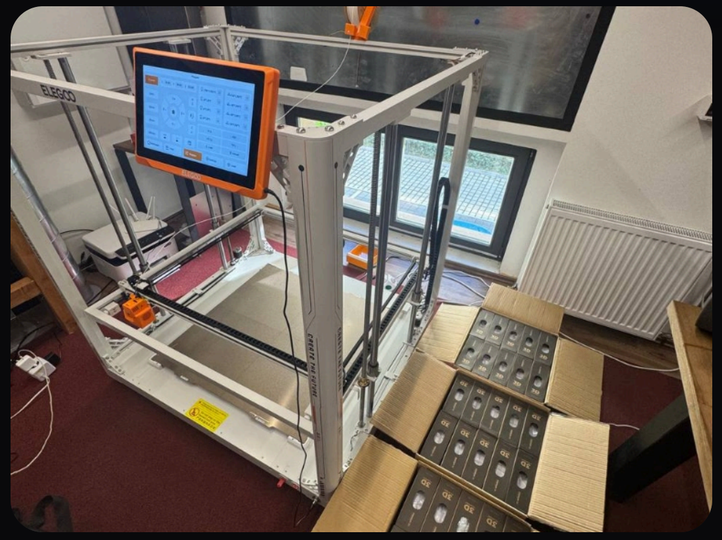

2× V2 in construction

Prague high school

3× V1 · €705k

Delivering to MKovo in Q1

16 weeks → 48 hours

Tooling from our own 3D print farm

We don’t draw hockey sticks.
We sign contracts.

€705k
Signed contracts

€2.8M
Pipeline from 16 signed LOIs

€10M
Bond underwriting committed

€200k
EU grant · 2 patents filed

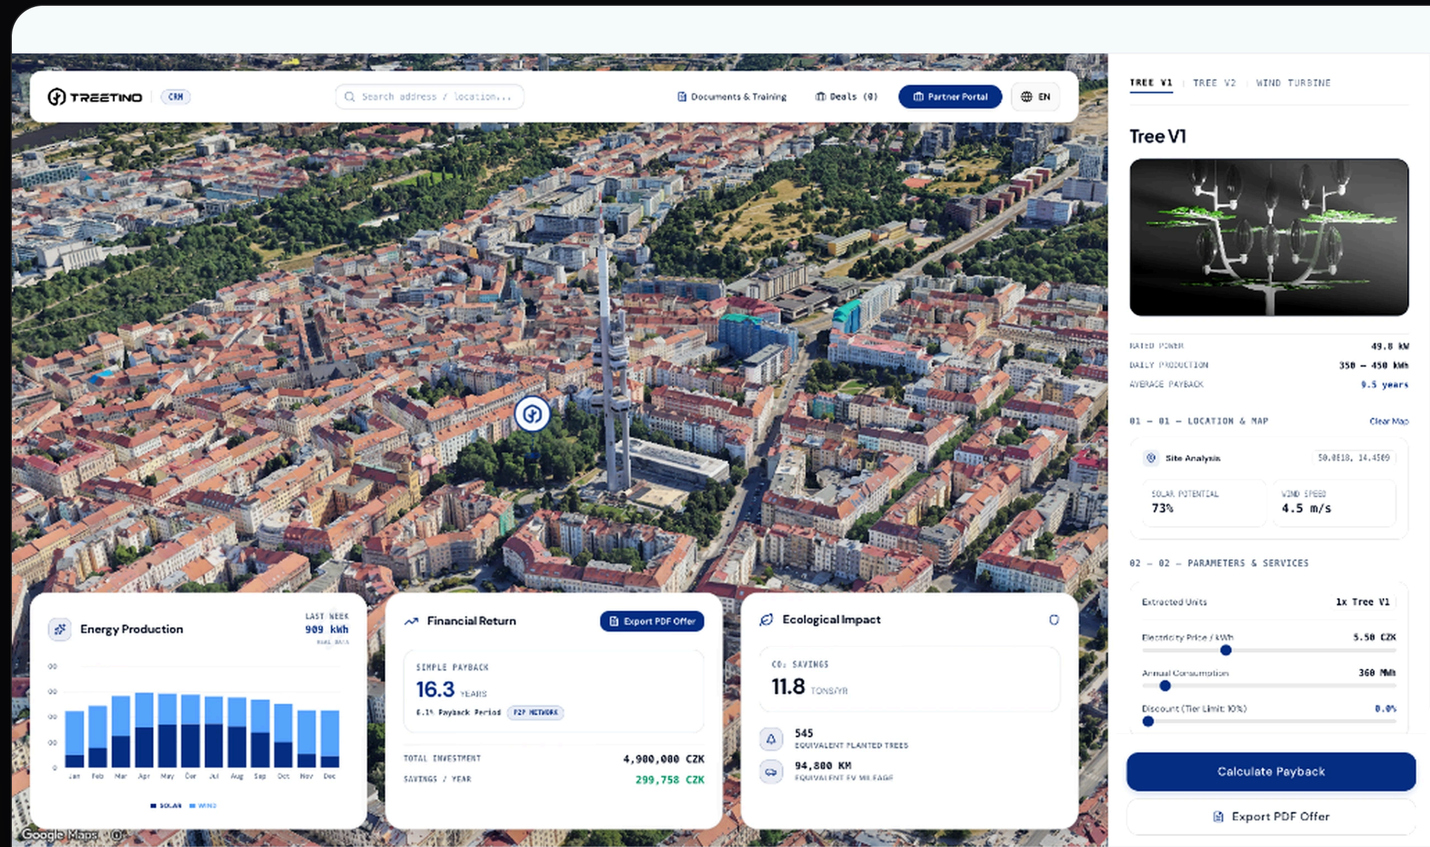

We automated the sales engineer. A quote in 120 seconds.

120 s

From a pin on Google Maps to an audited ROI quote

€0

Fixed CAC — partners across Europe sell for us

Every kWh, immutably on Solana.

Our oracle tokenizes trees, batteries and EV hubs, so anyone can own a piece of the grid.

2nd

We earn three times on every tree.

01

Hardware

40.4% margin

€95k profit on every V1 sold

02

Software

€3,800 / tree / year

AI tracking switched off = 30% less energy

03

Protocol

Minting + yield share

Tokenized CapEx funds the next tree

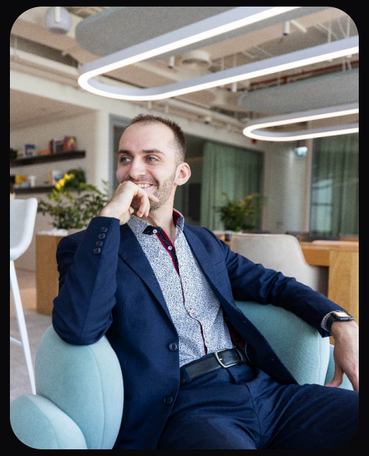

The people behind the trees.

Co-founder & CEO

Dominik Mašek

Hardware, serial production and enterprise sales.

Co-founder & CTO

Jakub Lustyk

Sales OS, AI telemetry and the Solana protocol.
