TREETINO × Refract

PayFi & RWA Launch Outline · Nov 2026

Clean Urban Power · Utility BESS · Solana PayFi Settlement

Real hardware. Instant USDC. Real-time yield.

Turning European EV charging and utility battery infrastructure into liquid, machine-verified on-chain cashflow.

30-Day Execution Delta

From RWA thesis to live PayFi stack.

01 · SOLANA & PAYFI — SHIPPED

2nd + 1st

Solana CZE & Marinade Wins

2nd Place at Solana Startup Village CZE, 1st Place Marinade Finance, and live card-to-USDC settlement built for The FinTechers Stablecoin Track.

02 · DEPIN ECOSYSTEM — SIGNED MOU

peaq

Ironyard RWA Incubation

Signed official partnership MoU with peaq to co-structure and fund our Tier 1 Prague charging & battery RWA pilot ($100k).

03 · COMMERCIAL PIPELINE — B2B DEMAND

€3.4M

New Smart Energy Forum LOIs

Added €3.4M in new commercial LOIs on top of €705k in signed Czech installations at a 40.4% hardware gross margin.

04 · INSTITUTIONAL BACKING — TRADFI + EU

Top 12

CzechInvest, Prusa & Banks

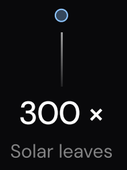

Top 12 of 200+ CzechInvest startups, Prusa Research Best HW Startup, Forbes Czechia feature, and active Czech bank acquiring talks.

Treetino V1 & V2 · 1 m² Footprint

Real steel and silicon.
Zero vaporware.

Patented biomimetic microgrid combining sun-tracking solar leaves, silent vertical wind turbines, LiFePO4 battery storage, and 22 kW EV charging.

49 kW
Peak hybrid output on 1 m²

40.4%
Hardware gross margin

24 / 7
Solar + wind + grid arbitrage

Signed B2B & Municipal Demand

Built, permitted, and under contract.

€4.1M+

Signed contracts (€705k) + active LOIs (€3.4M)

SIGNED CONTRACT · MUNICIPAL

€385k · Prague High School

2× Treetino V2 + campus storage

SIGNED CONTRACT · INDUSTRIAL

€320k · MKovo Hub

3× Treetino V1 + fleet EV charging

QUALIFIED PIPELINE · OCT 2026

€3.4M · Smart Energy Forum

Commercial parks, retail & EV fleets

BESS Přeštice · 8.6 MW / 17.2 MWh · Shovel-Ready

Utility-scale yield on the ČEZ grid.

Permitted 22 kV ČEZ Distribuce interconnection in West Bohemia. Monetizes SVR frequency balancing and 15-minute OTE spot-price spreads.

$1.0–1.5M
Projected annual net EBITDA

2.95 yr
Capex payback period

25–35%
Unlevered project IRR

Tier 1 Vault · SIC Smíchov (Prague 5)

Live Prague hub. 30.5% APY.

Treetino V1 + dual 22 kW EV charging + battery buffer at Středočeské inovační centrum — structured with peaq as our first on-chain RWA facility vault.

$100k
Turnkey ($60k net of EU grant)

18.3%
Base unsubsidized net APY

30.5%
Grant-levered vault APY

VAULT #001 · PRAGUE INNOVATION HUB

$18.3k/yr net cashflow · EV + Peak Shaving + Spot

PEAQ INCUBATED

EU MiCA Title IV Reality Check

Don’t issue an EU stablecoin. Settle in regulated USDC.

REJECTED PATH

Proprietary EU Stablecoin Issuance

Why issuing “EUR-Tree” breaks in Europe

- **Triggers MiCA Title IV EMI license** — requires €350k+ regulatory capital, ČNB supervision, and 12–18 months of legal freeze.
- **MiCA Art. 50 bans interest on EMTs** — legally prohibits passing energy yield directly through a stablecoin wrapper.
- **Fragments DEX liquidity & spooks banks** — creates instant friction with Czech acquiring banks and municipal buyers.

SHIPPED ARCHITECTURE

PayFi Machine Rails + $TREE Protocol

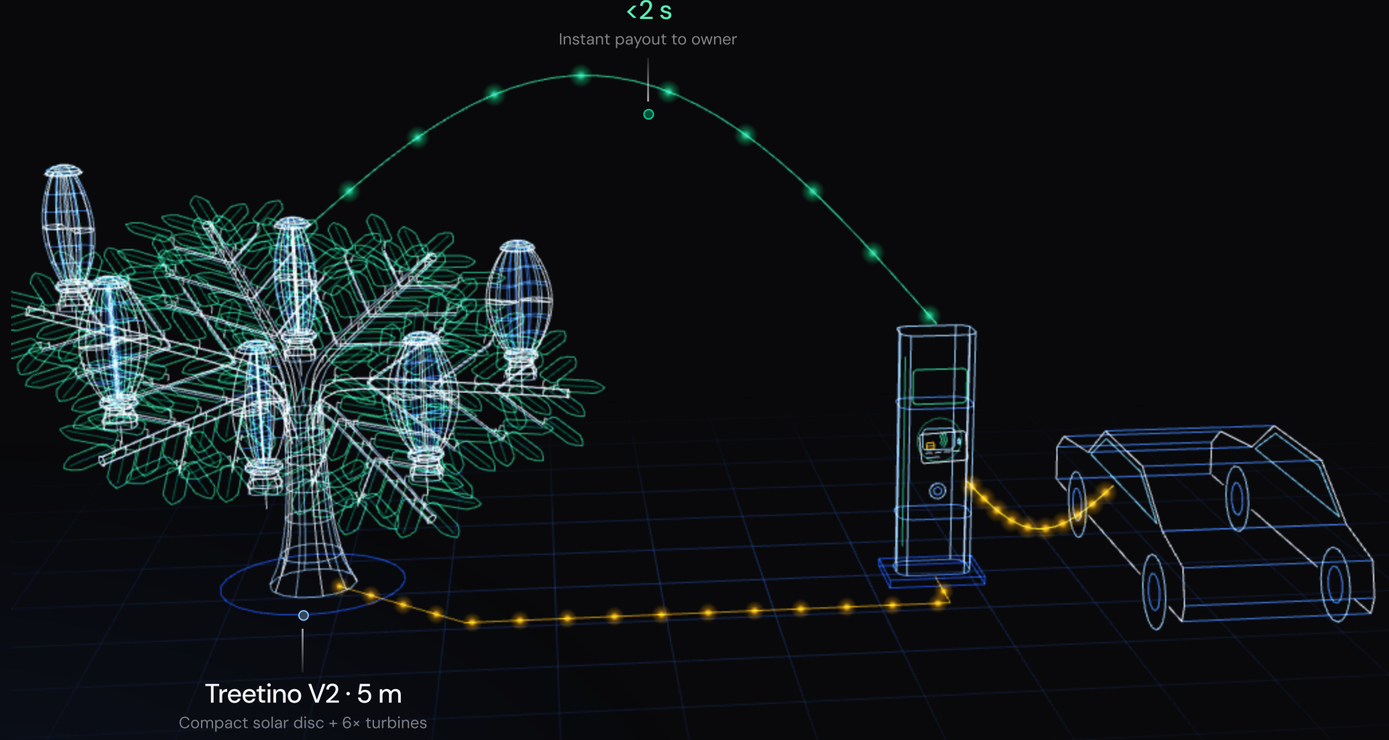

Fiat at the plug → Circle USDC/EURC on Solana

- **Zero MiCA issuer liability** — EV drivers tap Apple Pay or Visa in EUR/CZK; licensed EMI/VASP settles Circle `USDC` / `EURC`.
- **1.8-second programmable RWA yield** — net kWh cashflow streams straight into Solana facility vaults with full legal clarity.
- **Deep Day-1 liquidity + $TREE upside** — vaults pay real `USDC` while protocol fees buy back `$TREE`.

Invisible Web3 · Instant Settlement

Apple Pay at the plug.
Solana under the hood.

Zero crypto wallets for drivers. Machine-verified USDC lands in the vault seconds after unplugging.

PRAGUE · SIC SMÍCHOV · BAY 02

18.4 kWh

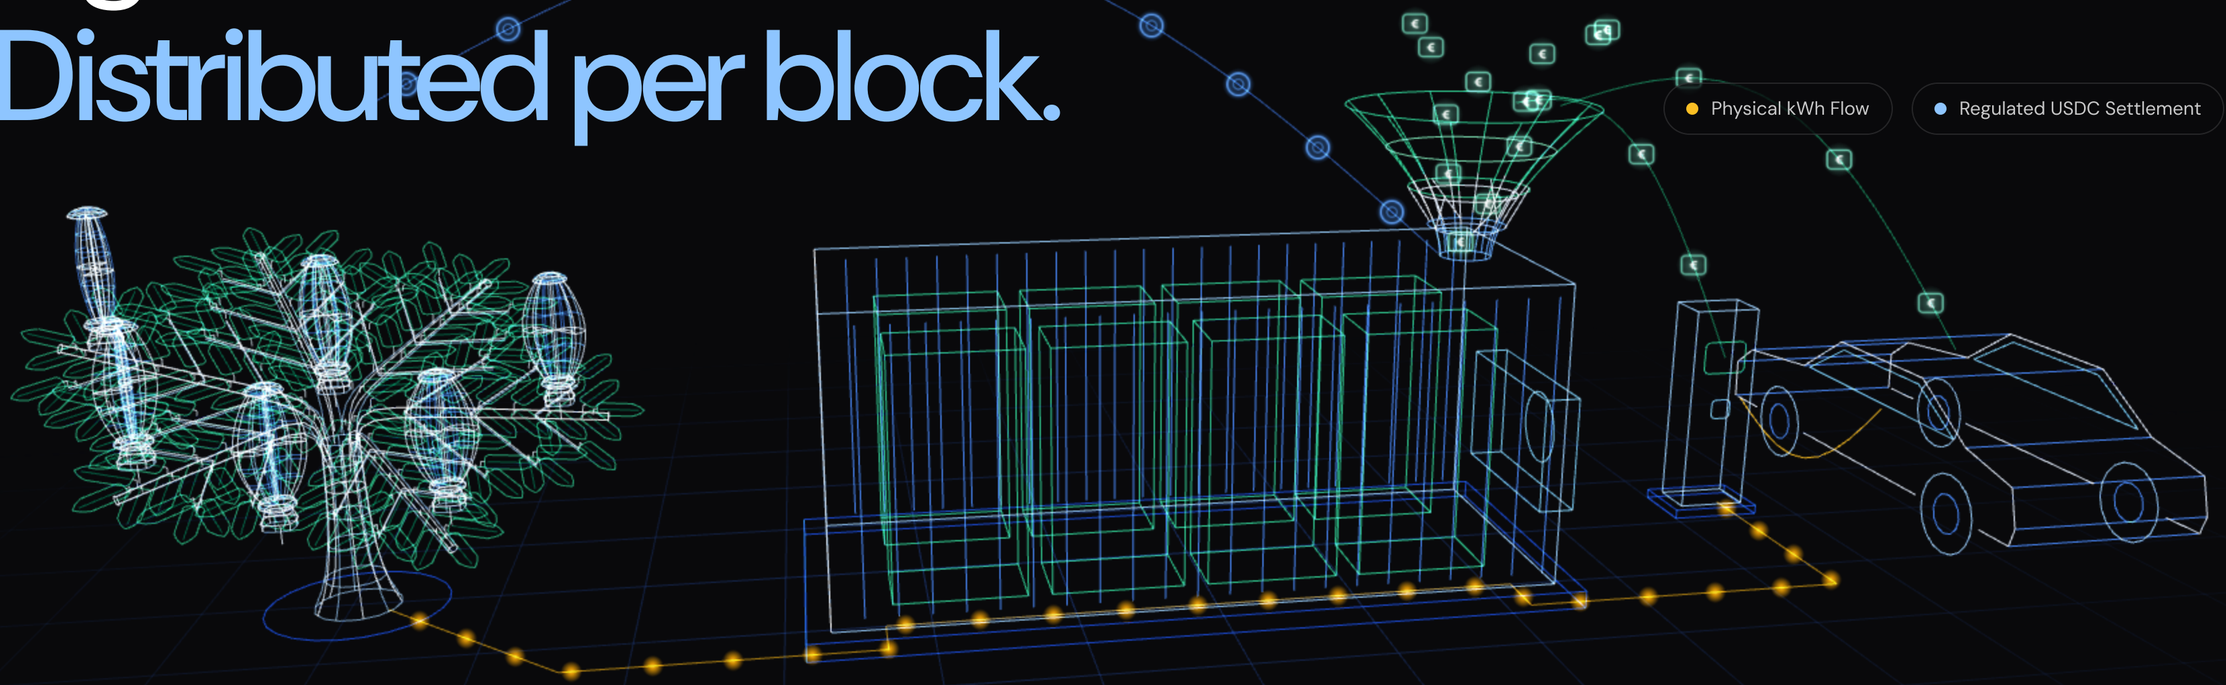

22 kW AC · Victron + OCPP 2.0.1 signed

Driver paid (Apple Pay)	€8.28 EUR
Licensed PayFi conversion	8.94 USDC
Vault split (85% LP / 15% O&M + $TREE)	+7.60 USDC

SOLANA PDA VAULT SETTLED 1.8 s

Hardware Oracle → On-Chain Escrow

Signed at the inverter. Distributed per block.

0.0 s

Card Tap or Grid Trade

EV session or 15-min OTE dispatch

0.6 s

Hardware Oracle Proof

Victron Cerbo GX + OCPP 2.0.1 hash

1.4 s

Fiat → Circle USDC

Regulated acquiring + VASP rail

1.8 s

Vault + $TREE Buyback

Claimable on Solana (400 ms finality)

TREETINO

LIVE PRODUCT · SOLANA VAULTS & TELEMETRY

Built for Post-TGE Longevity

Two clean layers.
Zero Ponzi emissions.

LAYER 01 · ASSET VAULTS

18 – 30% REAL APY

Non-Dilutive USDC Facility Vaults

Fractionalized RWA pools per energy site (SIC Smíchov, Přeštice BESS). Investors deposit USDC and claim real kWh revenue with zero token inflation risk.

LAYER 02 · PROTOCOL TOKEN

$TREE · 1B FIXED SUPPLY

$TREE PayFi Coordination & Fee Engine

Captures **1.5% hardware origination fees**, **10% performance fees on net kWh yield**, and **PayFi tap / TreeApp SaaS fees** — driving programmatic buybacks, vault priority access, and boosted staking tiers ($35M FDV seed benchmark).

Institutional Safety + Global Web3 Scale

Bank-safe in Europe. Liquid globally.

EU HARDWARE OPCO

Treetino Corp s.r.o.

Czech Republic · 100% Ring-Fenced

- Holds EU patents, Prusa R&D & manufacturing IP
- Executes municipal, school & MKovo B2B contracts
- Receives CzechInvest & EU modernization grants
- Maintains Czech bank & Tapaya card-acquiring rails

0% TOKEN ISSUANCE LIABILITY

ARM'S-LENGTH SLA

Turnkey Hardware & O&M

Engineering, grid permits & maintenance

SIGNED ORACLE FEED

Metered USDC Settlement

1.5% origination + 10% net yield fee

WEB3 PROTOCOL ENTITY

Treetino ProtocolCo

Dedicated Foundation / BVI / Swiss Wrapper

- Issues $TREE & governs Solana RWA smart contracts
- Runs SAFT / token warrant rounds with Web3 funds
- Executes global KOL, community & launchpad GTM
- Manages Tier-1 CEX listings & market-maker liquidity

SCOPE OF TREETINO × REFRACT MANDATE

Why Treetino × Refract Works

We build the grid.
You scale the liquid market.

WHAT TREETINO BRINGS

01 Contracted Hardware & 8.6 MW BESS

Patented 49 kW kinetic trees (€4.1M+ signed/LOI pipeline) plus shovel-ready utility storage ($1.0M–$1.5M annual EBITDA).

02 Live Solana PayFi Code & TradFi Rails

Working Solana vaults, Victron/OCPP telemetry, peaq Ironyard MoU, CzechInvest/Prusa backing, and bank acquiring partnerships.

WHAT REFRACT BRINGS

03 Proven RWA Fundraising & KOL Engine

Battle-tested RWA token narrative from scaling `$LINGO`, backed by direct access to 500+ Web3 funds, angels, and Tier-1 creators.

04 Launchpad, Market-Making & CEX Pipes

End-to-end TGE orchestration across ChainGPT Pad, partner launchpads, liquidity provisioning, and Tier-1 CEX listing committees.

Validate Fast · Scale With Zero Cash Burn

Two clear tracks. Milestone-gated.

TRACK 01 · WEEKS 1–6

PROVE SYNDICATE FIT

Strategic Anchor + RWA Vault #1

Close initial Web3 strategic SAFT tranche and co-fill on-chain USDC facility liquidity before committing TGE marketing spend.

$500k+
First strategic close gate

$0 Upfront
OpCo hardware cash burn

Escrowed
GTM warchest funded from raise

TRACK 02 · WEEKS 4–14

UNLOCKED BY TRACK 01

Full $TREE PayFi Launch & Tier-1 TGE

Scale global Web3 community, launchpad rounds (ChainGPT Pad + partners), and Tier-1 CEX listings backed by live mainnet energy yield.

$2.5M–$5M
Target protocol & vault raise

Day-1 Yield
Live USDC staking at TGE

24m Vest
Long-term $TREE alignment

Live Alignment Model · Drag to Stress-Test

Aligned upside. Zero upfront burn.

Ring-Fenced: EU Grants, peaq & Existing TradFi Excluded from Fee Waterfall

Web3 Protocol Raise (Refract Syndicate + IDO) **$2.5M**

$0.5M $3.0M $5.5M

On-Chain USDC RWA Vault TVL **$1.5M**

$100k $5.0M $10.0M

Escrowed GTM & KOL Budget (From Closed Raise) **10% · $250k**

5% 10% ($0 upfront) 18%

Success Fee (Whitelisted Refract Intros Only) **8% + 2.0% $TREE (24m vest)**

5% 8% standard 12%

NET TREASURY TO RWA & PROTOCOL EXPANSION

$2.05M

After $250k escrowed GTM warchest & $200k whitelisted success fee · **$0 upfront OpCo cash drain**

VAULT LP YIELD / YR

$308k

Real USDC streamed from kWh & BESS

$TREE BUYBACK & FEES / YR

$89k

1.5% origination + 10% yield + PayFi SaaS

Q4 2026 – Q1 2027 · Objective Milestone Gates

Twelve weeks to liquid RWA rails.

WEEKS 1–2

Ring-Fence & Term Sheet

Sign milestone mandate, lock named investor whitelist, and incorporate ProtocolCo wrapper.

WEEKS 3–5

Strategic Anchor Close

Refract syndicate roadshow; close first $500k+ SAFT gate to unlock escrowed GTM budget.

WEEKS 6–8

Mainnet Vault #001

Deploy SIC Smíchov USDC vault on Solana mainnet with live hardware oracle dashboard.

WEEKS 9–10

Launchpad & CEX Prep

Institutional-grade PayFi campaign, ChainGPT Pad / IDO rounds, and market-maker onboarding.

WEEKS 11–12

$TREE TGE + BESS Scale

Liquid TGE with Day-1 real USDC staking yield and Přeštice 8.6 MW BESS tranche kickoff.

Decision Checklist for Today's Call

Clear guardrails. Fast execution.

TREETINO COMMITS DAY 1

Working Solana PayFi code & live telemetry — ready for technical due diligence and mainnet audit.

Real European energy cashflows — €4.1M+ commercial pipeline, SIC Prague hub, and 8.6 MW BESS Přeštice.

Direct founder bandwidth — rapid investor calls, data-room transparency, and physical Prague site visits.

5 POINTS TO LOCK WITH REFRACT

01 **PayFi over Stablecoin Issuance:** Circle `USDC`/`EURC` settlement + `$TREE` (no MiCA EMT trap).

02 **Entity Firewall:** Dedicated ProtocolCo issues `$TREE`; Czech hardware OpCo stays 100% ring-fenced.

03 **Raise-Funded GTM:** $50k+ KOL/marketing warchest unlocks from first closed Web3 tranche ($0 upfront hardware drain).

04 **Whitelisted Attribution:** Success fees apply strictly to approved Refract intros + 24m vested `$TREE`.

05 **Institutional Brand Tone:** Clean PayFi / RWA narrative safe for EU banks, schools & CzechInvest.

TREETINO × Refract

Next Step · 1-Page Term Sheet by Friday

Treetino × Refract · PayFi & RWA Launch

Tap a card. Settle in USDC.
Own the European grid.
