TREETINO

The FinTechers Hackathon 2026

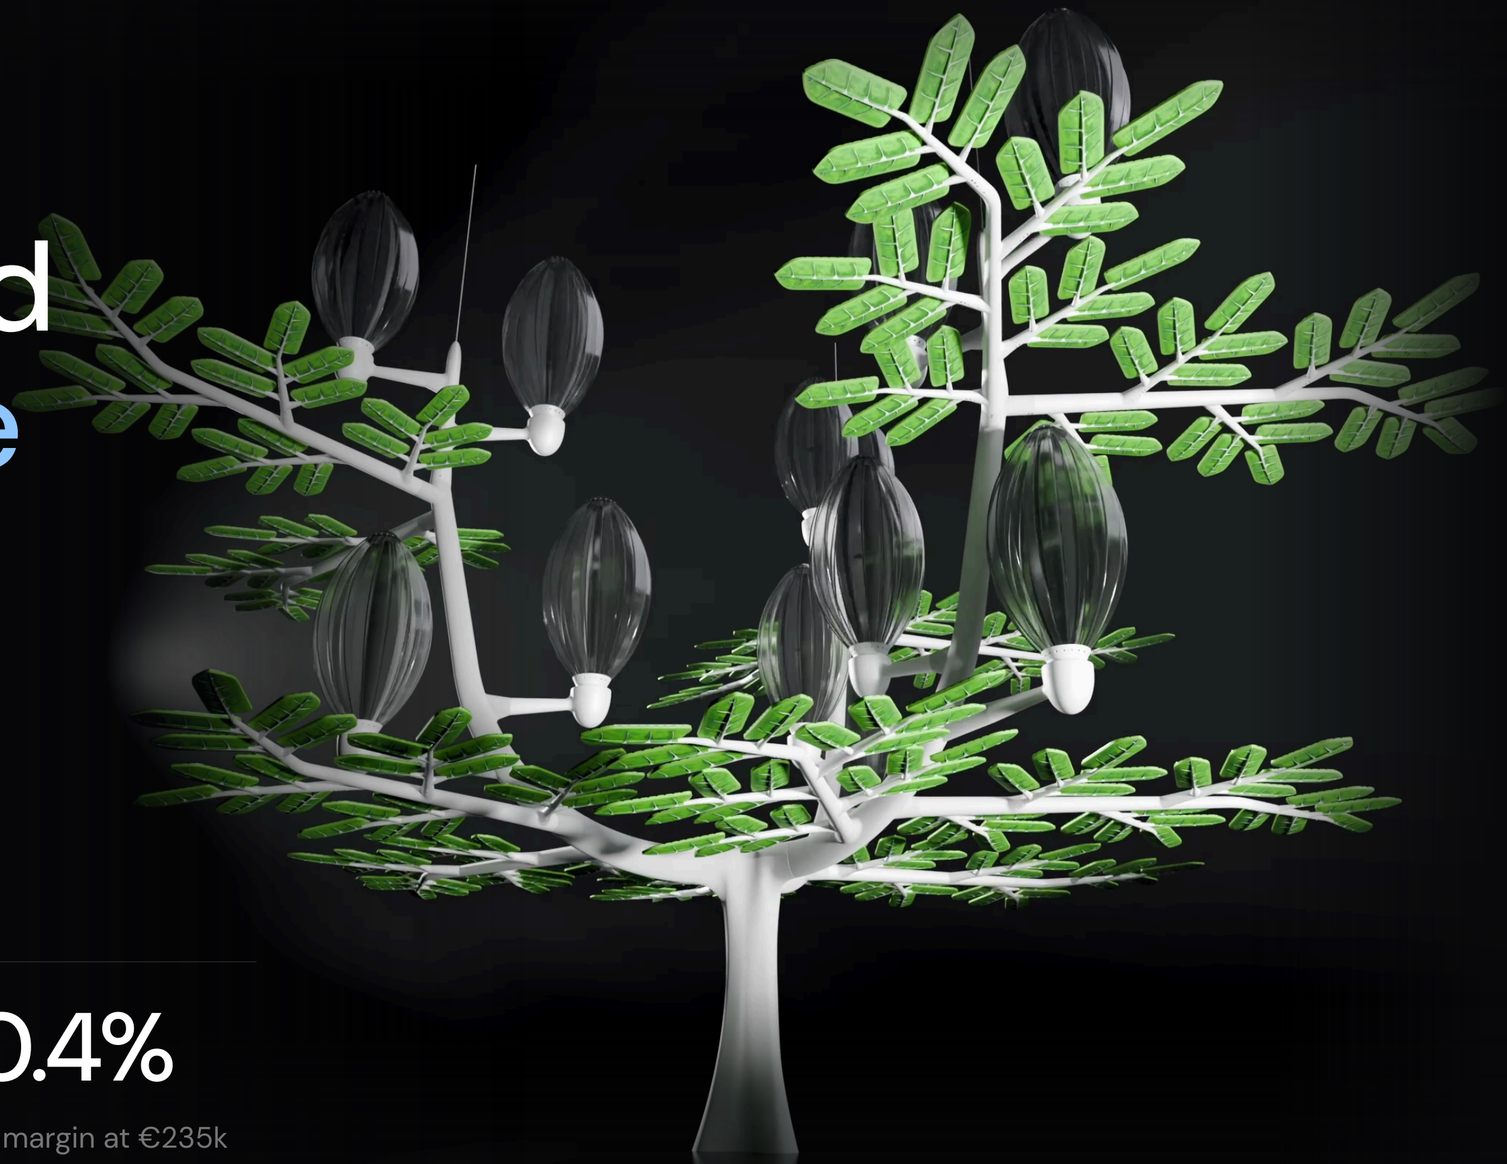

Real trees. Real energy. Real-time yield.

Track 4 · FinTech & Real-World Assets

Treetino V1

49 kW of wind and sun on one square metre.

300
Solar leaves

12
Wind turbines

40.4%
Gross margin at €235k

Backed by CzechInvest and SIC

We build real trees.
€3.4M in LOIs last week.

2× V2 in construction

Prague high school

3× V1 · €705k signed

Delivering to MKovo

€3.4M in signed LOIs

From a single expo

Proven on Solana. Funded by peaq.

Our hackathon wins turned into an MoU with peaq's Ironyard pools. RockawayX is in talks.

2nd
Place · Solana CZE

1st
Place · Marinade track

MoU
Signed · peaq Ironyard

Tier 1 · SIC Smíchov, Prague

The first hub peaq is funding.

18.3%

Base APY · 30.5% with grant

$18.3k

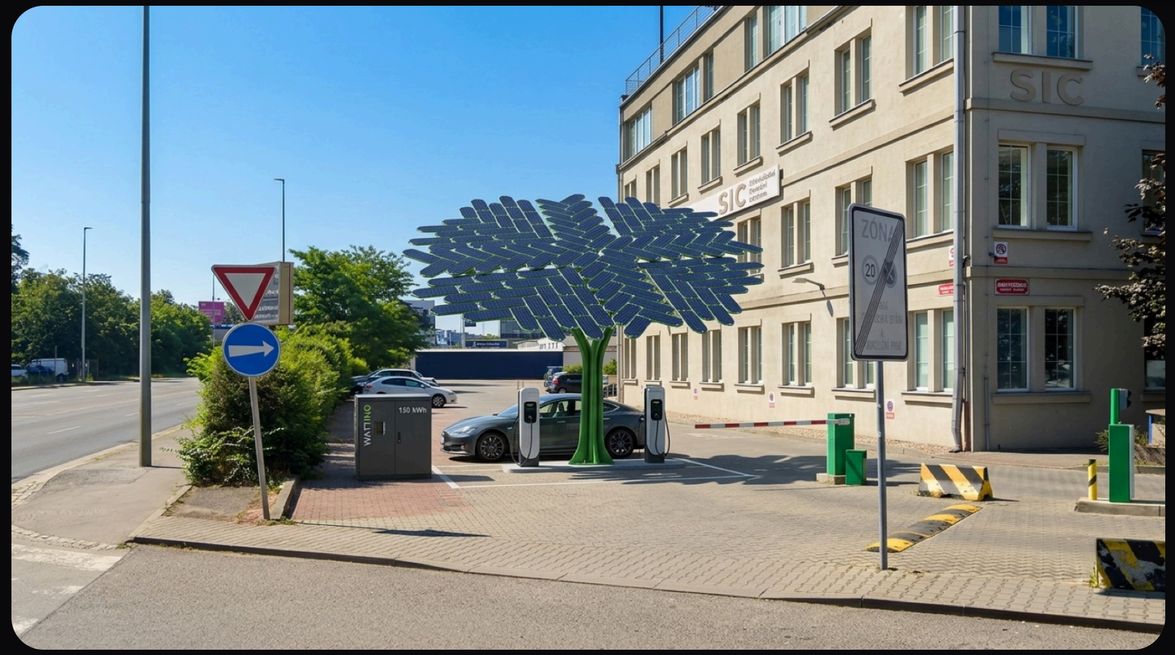

Net annual yield · 3.3 yr payback

$100k

Turnkey · $60k after grant

12 kW

Tree V2 · 150 kWh · 2 chargers

Drivers tap cards, not crypto wallets.

Before the hackathon

Solana protocol + live hardware oracle

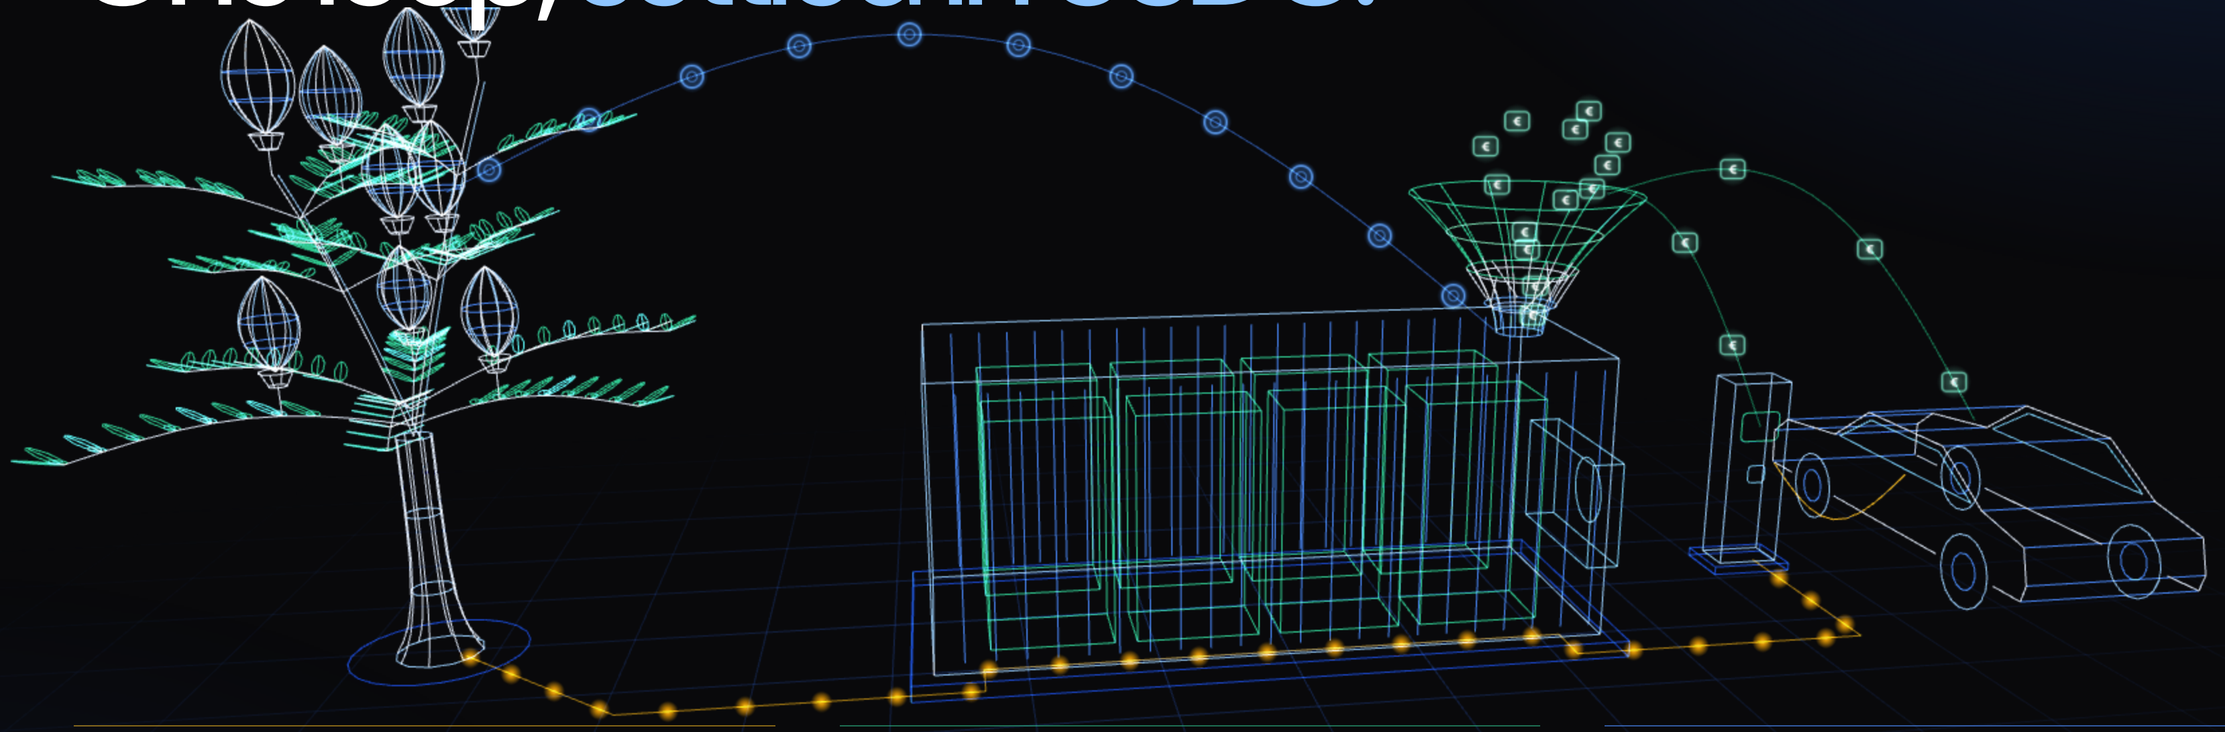

- Fractional tree shares and USDC reward vaults
- Live kWh from Victron inverters and batteries
- But: needed a crypto wallet and manual invoicing

Built here, in 30 hours

Fiat rails straight into the protocol

- On-ramp in CZK and EUR: card, Apple Pay, SEPA Instant
- Card tap at the charger settles on Solana in under 2 s
- 1:1 reserve proof: bank balance vs. USDC vault

One loop, settled in USDC.

Energy

Tree → battery → charger → car

Fiat

Card payment in CZK or EUR → on-ramp

USDC

Converted → streamed to investors

TREETINO

01 Kickstarter for energy | 02 Fiat on-ramp | 03 Card payment → yield

03 · The killer feature MoU signed

A driver taps a card. Investors earn in seconds.

Energy delivered 68 kWh → Driver pays by card 721 Kč → Settles as stablecoin 31.06 USDC → Split to co-owners 3 owners · 0.05 s

New session

● Streamed to 3 local co-owners in 0.05 s 31.06 USDC · Solana

Traditional RWA pays out once a year

We pay out the second a car starts charging.

0.0 s

Driver taps a card

450 CZK for 30 kWh at SIC

0.6 s

Meter meets payment

Meter reading matched, CZK → USDC

1.4 s

Settled on Solana

20 USDC into the tree's vault

1.8 s

Yield is claimable

Keep it on-chain or cash out

No car plugged in?
The battery keeps earning.

01

Charging

$7.7k / year

30 MWh sold through two 22 kW chargers

02

Peak shaving

$7.2k / year

35 kW cut from the SIC building's peak demand

03

Spot trading

$5.8k / year

Buys cheap at night, sells into the evening peak

Fiat in. Hardware verified. Auditable on Solana.

01

On-ramp

No wallet needed

Card, Apple Pay or SEPA in CZK or EUR

02

Oracle

Real meters, real receipts

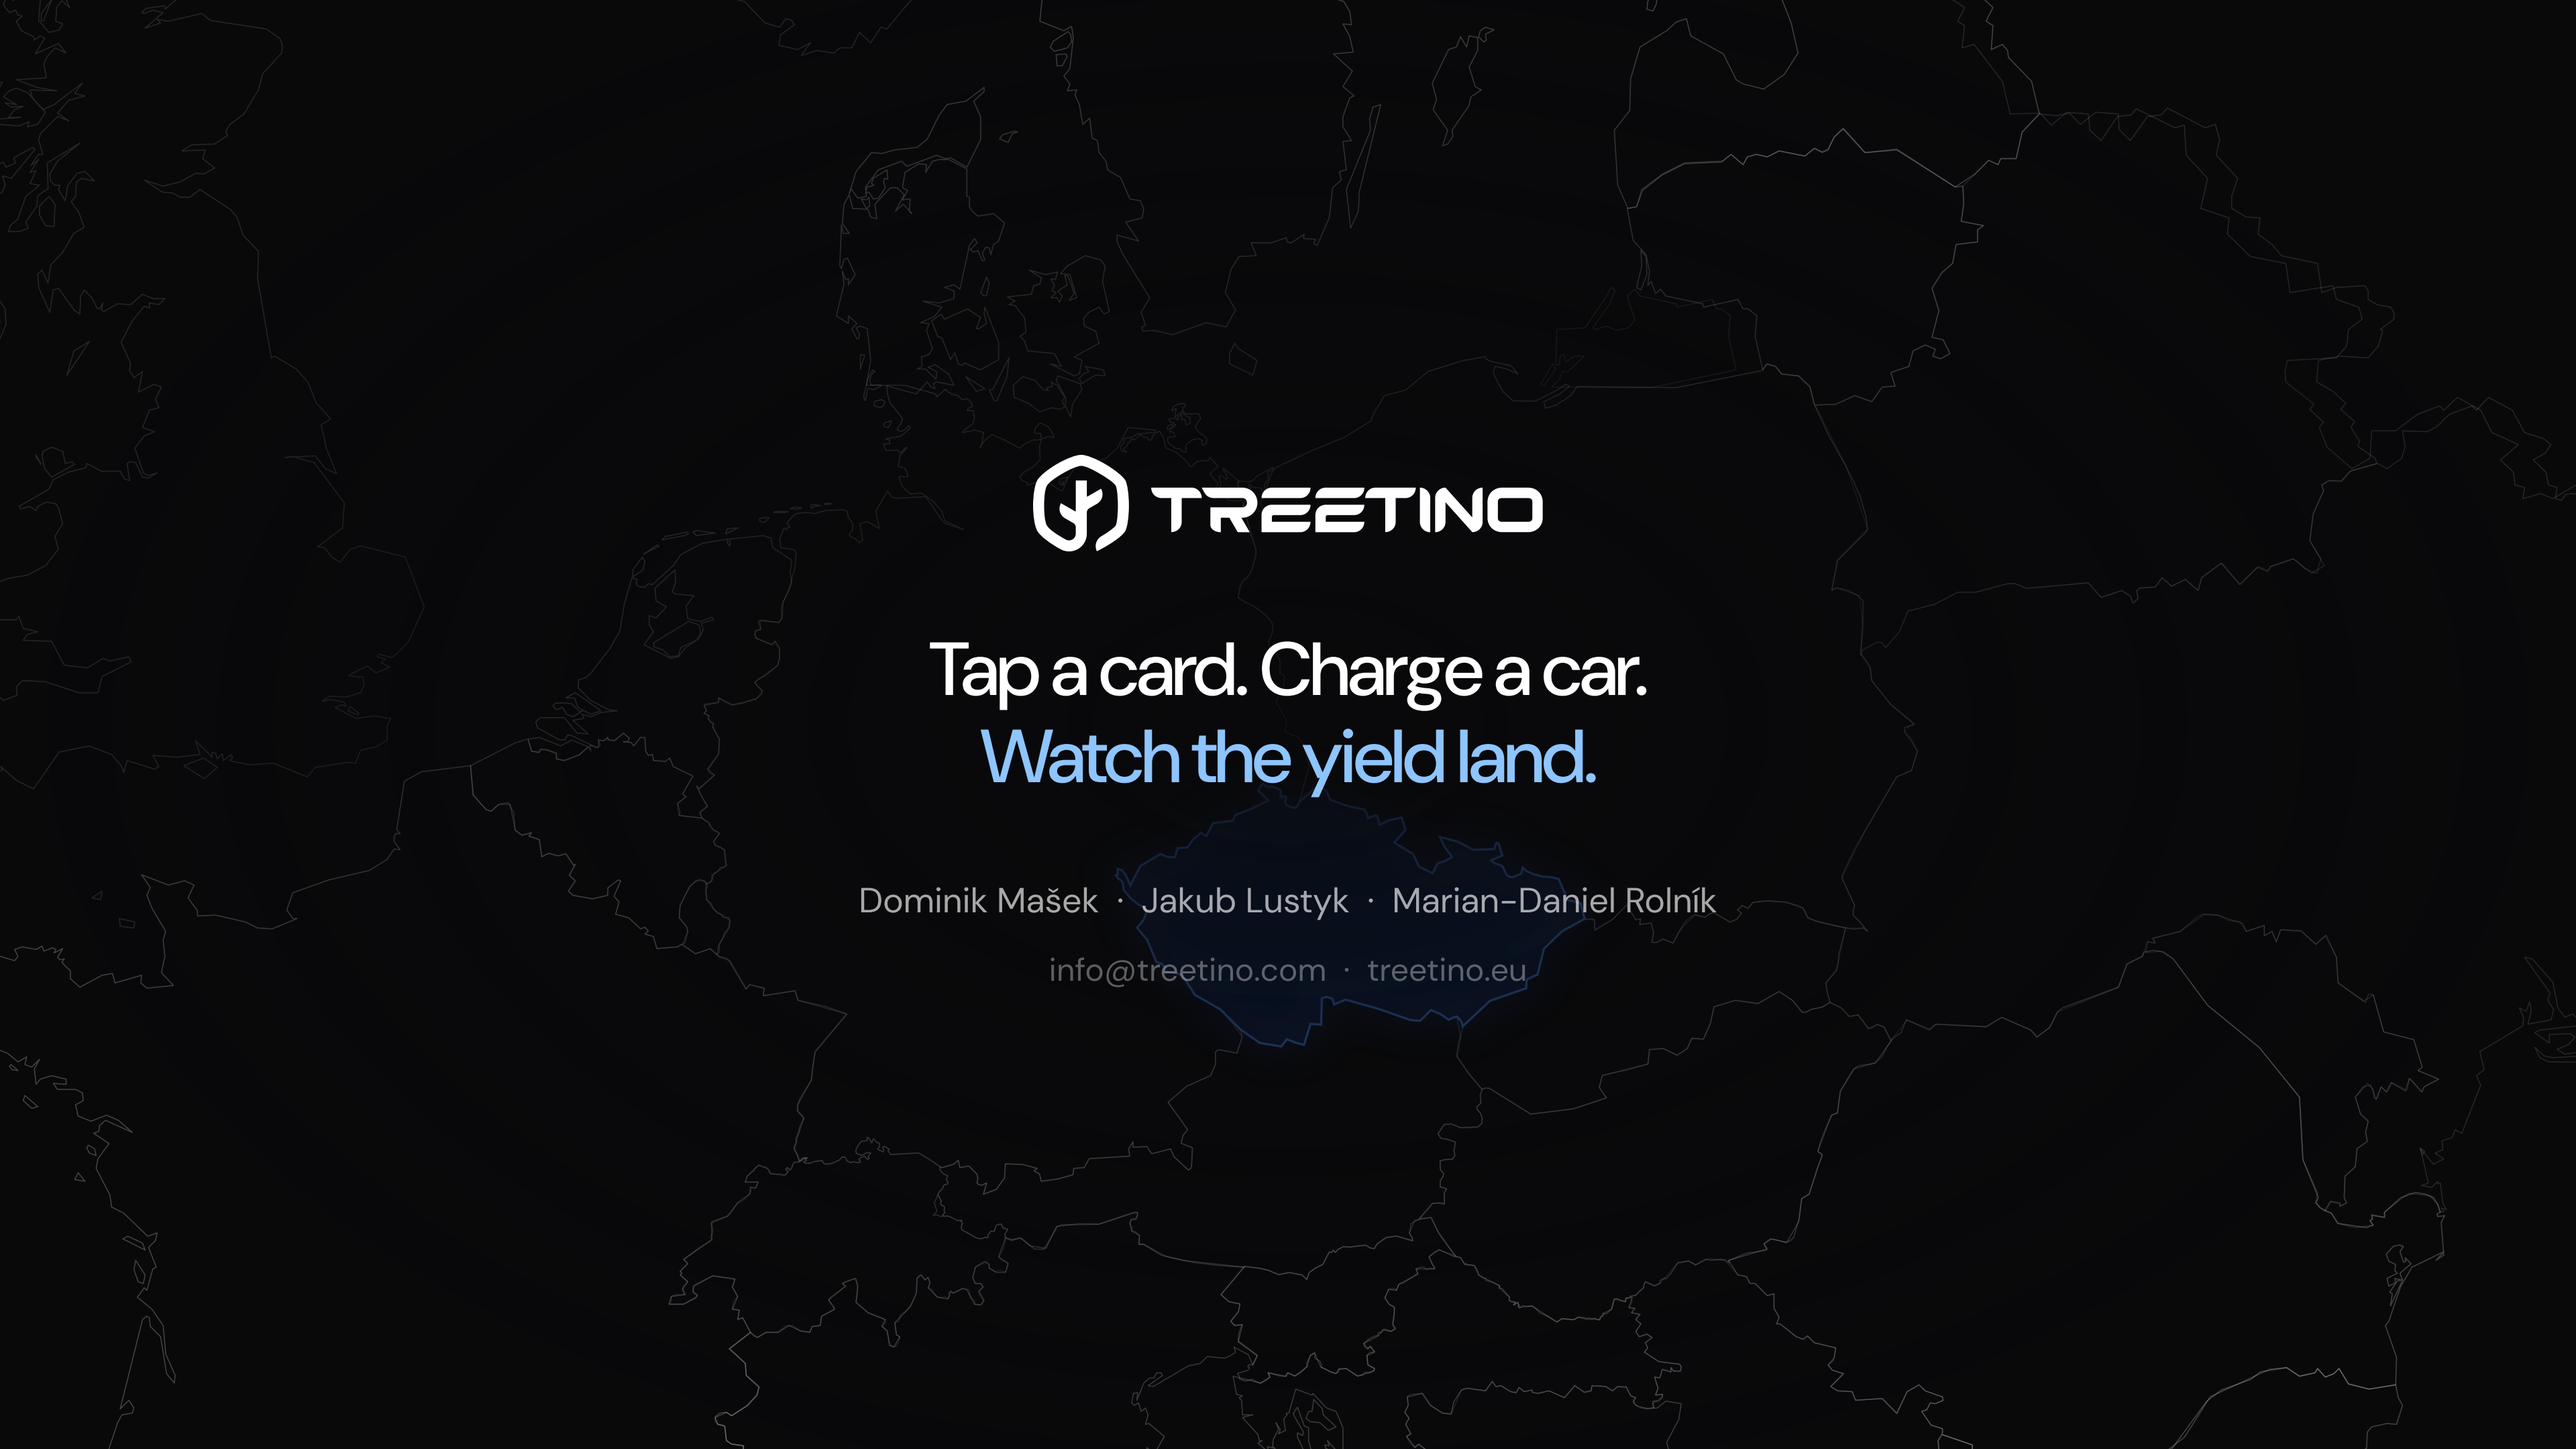

Victron, OTE spot prices, charger payments

03

Audit

1:1 reserve proof

Each USDC traced to fiat, kWh, receipt

Tap a card. Charge a car.
Watch the yield land.
